

Sambhab Mishra at LR DAV Public School

(Mr. Niranjan Swain class)

Elements Used:

EARTH
 STARS
 SUN
 MOON
 SR-7 ROCKET
 SMALL CUBE SHAPED SATELLITES

I have used these elements in my design because in my design you can see a Half moon which represents the first letter of our mission i.e. 'C' which means CUBE. You can also see SR-7 Rocket which represents letter 'I' and above the rocket you can see a star which represents the dot on the letter 'i'. You can also see a wave of small cube shaped satellite coming out from the SR-7 like a wave smoke coming out of the rocket which represents the 3rd and last letter of our mission i.e. 'S'. As a whole CiS i.e. CUBE IN SPACE.

You can see the laughing face of the moon which represents courage, encouragement to move forward and success of the SR-7 Mission.

The shining star represents Outstanding, being very or most important, smart, skillful , bright future. The sun has been a symbol of power, growth, health, passion and the cycle of life.

The earth represents the ground, stability, a foundation.

In the corner of my design you can see the SR-7 Rockets which are stretching my design in all 4 direction i.e. EAST, WEST, NORTH, SOUTH which represents the diversification and spreading of CiS competitions in all direction and every corner of the world.
